Nationality: Indian

PROFESSIONAL SUMMARY

Results driven Data Analytics Professional with a robust foundation in AI/ML from UPES and hands on experience in data quality assurance and auditing. Proficient in leveraging SQL and advanced visualization tools to transform complex datasets into actionable insights. Proven ability to optimize data workflows, ensure high-fidelity accuracy, and bridge communication between technical teams and business stakeholders to drive strategic decisions.

EDUCATION & TRAINING

BCA in Computer Application

University Of Petroleum and Energy studies

2022 – 2025

Grade: 7.25/10

WORK EXPERIENCE

INNODATA — Noida, INDIA

Nov 2025 – March 2026

DATA ASSOCIATE

- Conducted routine audits to ensure data accuracy and integrity.
- Supported project teams by providing relevant data insights and reports.
- Leveraged software to compile and model data.
- Audited the accuracy of existing databases by running tests against sample datasets.
- Performed quality assurance checks on extracted data to ensure accuracy of results.

IBM Phemosoft — remote, India

06/2024 – 08/2024

Software Intern (Internship)

- Developed a Machine Learning-based DDoS Attack Detection System using Python and Scikit-learn.
- Collected, cleaned, and analyzed network traffic datasets (CICIDS2017, UNSW-NB15) for model training and evaluation.
- Applied feature engineering and trained classification models such as Random Forest and Decision Trees to detect malicious traffic.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-Score metrics.

PROJECTS

[6]

Face Detection Attendance System

- Led a cross-functional team to design and deploy an automated attendance system, achieving a 98% accuracy rate in real-time facial recognition and reducing manual logging errors.
- Engineered the core backend architecture and integrated advanced computer vision algorithms to seamlessly process video feeds and match facial embeddings against a secure database.
- Optimized face detection latency, streamlining the entire authentication-to-logging pipeline to execute under 1.2 seconds per user.

[4]

Zeniski

- Engineered a machine learning model utilizing collaborative and content-based filtering algorithms to analyze user behavioral patterns and deliver highly personalized product/content recommendations.
- Developed data preprocessing pipelines using Pandas and NumPy to clean, structure, and transform large-scale interaction datasets for model training.
- Implemented and optimized predictive algorithms via Scikit-Learn, significantly enhancing recommendation relevance and user engagement metrics.

TECHNICAL & SOFT SKILLS

Programming Languages:

PythonSQL

Frameworks & Libraries:

PandasNumPyScikit-LearnMatplotlib

Software & Tools:

TableauPower BIAvance ExcelGitHubJupyter NotebookMySQL

Technical Skills:

Data Cleansing & PreprocessingStatistical Data AnalysisData VisualizationPredictive ModelingExploratory Data AnalysisFeature EngineeringBusiness Analytics

Soft Skills:

Data-Driven Decision MakingProblem SolvingAnalytical ThinkingTechnical Documentation

LANGUAGE SKILLS

Mother tongue(s): Hindi

Other language(s):

Language	Level
Eglish	CEFR B2
